KEY FEATURES AND HIGHLIGHTS

High Performance and scalability:-

With high switching capacity, AP SGXQ7200-48X2Q supports wire-speed L2/L3 forwarding and high routing performance for IPv4 and IPv6 protocols.

The 10 Gigabit Ethernet connectivity of AP SGXQ7200-48X2Q is accomplished via a hot-pluggable 10 Gigabit SFP+ transceiver which supports distance up to 300 meters over multi-mode fiber and 10 to 40km over single-mode fiber (The distance depends the optical module chosen).

High Reliability:-

SG7200 series support modular 1+1 redundant power supplies and 4+1 redundant fans. Business won't be interrupted in case replacing power supplies and fans. System supports dual images. Even though the primary image was destroyed, system will still boot via backup image normally.

VSF (Virtual Switch Framework):-

As new generation data center switch, SG7200 support VSF which not only guarantees the flexibility, but also enhanced the scalability of datacenter network.

Flex Resource:-

Flex Resource is able to allocate, recover and reallocate hardware resource dynamically according to demand. It can increase the utilization of the hardware resource.

Rich L3 Features:-

AP SGXQ7200-48X2Q delivers high-performance, hardware-based IP routing. RIP, OSPF and BGP provide dynamic routing by exchanging routing information with other Layer 3 switches and routers. With AP SGXQ7200-48X2Q, customers could easily achieve Policy based Route (PBR), which is important when they need multi exit application.

MPLS/VPLS:-

AP SGXQ7200-48X2Q supports MPLS L3 VPN/MPLS L2 VPN(VPLS) and helps customer to construct more secure/extendable network. With max.255 VRF instances, AP SGXQ7200-48X2Q series could be deployed as P& PE devices, guarantees the variety of services.

Abundant IPv6 Support:-

AP SGXQ7200-48X2Q supports IPv6 switching and routing based on hardware for maximum performance. With increased network devices growing and the need for larger addressing and higher security becomes critical, AP SGXQ7200-48X2Q will be a right product to meet the requirement. AP-SGXQ7200-48X2Q passed IPv6 form Phase II certification, which is the best proof of the application.

Strong Multicast:-

AP SGXQ7200-48X2Q supports abundant multicast features such as IGMPv1/v2/v3 snooping and fast leave and IGMPv1/v2/v3, PIM-DM, PIM-SM, PIM-SSM and even MSDP. With Multicast VLAN Register (MVR), multicast receiver/sender control and illegal multicast source detection functions, APSGXQ7200-48X2Q provides great application experience for customer.
