Product Overview

AP-DCS7510-48S6Q-HI data center 40G switch uses advanced hardware and software architecture design, support built-in modular 1+1 redundant power supplies, 4+1 redundant fans, cross ventilation and wind direction adjustable. It has 48*10GE SFP+ ports and 6*40G QSFP+ ports.

AP-DCS7510-48S6Q-HI is ideal for cloud computing data center server access and core switch of small to medium datacenter. For campus or other large network, AP-DCS7510-48S6Q-HI could also be deployed at aggregation or core layer as its high performance and reliability.

Key Features and Highlights

High Performance and scalability

With high switching capacity, AP-DCS7510-48S6Q-HI supports wire-speed L2/L3 forwarding and high routing performance for IPv4 and IPv6 protocols.

The 10 Gigabit Ethernet connectivity of AP-DCS7510-48S6Q-HI is accomplished via a hot-pluggable 10 Gigabit SFP+ transceiver which supports distance up to 300 meters over multi-mode fiber and 10 to 40km over single-mode fiber (The distance depends the optical module chosen).

High Reliability

AP-DCS7510 series support modular 1+1 redundant power supplies and 4+1 redundant fans. Business won't be interrupted in case replacing power supplies and fans. System supports dual images. Even though the primary image was destroyed, system will still boot via backup image normally.

VSF (Virtual Switch Framework)

As new generation data center switch, AP-DCS7510 support VSF which not only guarantees the flexibility, but also enhanced the scalability of datacenter network.

Flex Resource

Flex Resource is able to allocate, recover and reallocate hardware resource dynamically according to demand. It can increase the utilization of the hardware resource.

OpenFlow

AP-DCS7510-48S6Q-HI supports OpenFlow 1.0 standard protocol. OpenFlow network is increasingly becoming a trend as the core protocol of SDN network. It makes the network easier programming OpenFlow brings the high performance to datacenter users via self-defined network. With OpenFlow, this product is ideal to build SDN test-bed for research institutes and SDN Experimental Bureau for large ISP and operator.

Rich L3 Features

AP-DCS7510-48S6Q-HI delivers high-performance, hardware-based IP routing.

RIP, OSPF and BGP provide dynamic routing by exchanging routing information with other Layer 3 switches and routers.

With AP- DCS7510-48S6Q-HI, customers could easily achieve Policy based Route (PBR), which is important when they need multi exit application.

MPLS/VPLS

AP-DCS7510-48S6Q-HI supports MPLS L3 VPN/MPLS L2 VPN(VPLS) and helps customer to

AirPro AP-DCS7510-48S6Q-HI Data Center Switch

construct more secure/extendable network. With max.255 VRF instances, DCS7510-48S6Q-HI series could be deployed as P & PE devices, guarantees the variety of services.

Abundant IPv6 Support

DCS7510-48S6Q-HI supports IPv6 switching and routing based on hardware for maximum performance. With increased network devices growing and the need for larger addressing and higher security becomes critical, DCS7510-48S6Q-HI will be a right product to meet the requirement. DCS7510-48S6Q-HI passed

IPv6 form Phase II certification, which is the best proof of the application.

Strong Multicast

DCS7510-48S6Q-HI supports abundant multicast features such as IGMPv1/v2/v3 snooping and fast leave and IGMPv1/v2/v3, PIM-DM, PIM-SM, PIM-SSM and even MSDP. With Multicast VLAN Register (MVR), multicast receiver/sender control and illegal multicast source detection functions, DCS7510-48S6Q-HI provides great application experience for customer
